## A NOTE FROM SANDLIN HOMES

# THANK YOU FOR *TRUSTING* US WITH YOUR NEXT HOME.

**W**e are honored to be part of your family's story. This guide walks you through everything you should expect between contract and closing — the twelve stages of your build, the four meetings along the way, the guidelines we live by, and the warranty that follows you home.

---

## GUIDELINES

# SEVENTEEN GUIDELINES.

*These are the commitments we make to each other. Please read carefully and route any questions through your Community Sales Manager.*

### 01 SELECTIONS LOCK AT CONTRACT

No changes to plan, elevation, structural, electrical, or plumbing options after contract. Design Gallery finalizes at your design appointment.

### 02 DEPOSITS & LOAN APPROVAL

Construction cannot begin until all deposits are received and your loan is fully approved.

### 03 DEPOSITS ARE NON-REFUNDABLE

All deposits are non-refundable, good-faith payments applied toward your final purchase price.

### 04 TIMELINES ARE ESTIMATES

Delivery may be affected by material availability, labor, weather, permitting, or inspections.

### 05 CLOSING DATES FOLLOW TILE

The earliest you receive an estimated closing date is after tile is installed.

### 06 ONE POINT OF CONTACT

All communication comes from your Community Sales Manager. Expect weekly updates once construction begins.

### 07 QUIET BEFORE THE DIG

Expect a period after contract before visible construction begins — blueprints, engineering, and permits.

### 08 TELL US ABOUT LIFE CHANGES

Notify your CSM and Lender immediately of changes in living, financial, or employment situation.

### 09 LENDER CHANGES HAVE A DEADLINE

Changes to your lender must be finalized before sheetrock is installed.

### 10 PREFERRED LENDER & TITLE

Builder Mortgage Direct and Trinity Title. Incentives and rate buydowns require closing with both.

### 11 SITE VISITS ARE SCHEDULED

Unaccompanied and unscheduled site visits are not permitted. Schedule with your CSM.

### 12 SAFETY ON SITE

Closed-toe shoes required. No children on site. No visits after dark.

### 13 COSMETIC REPAIRS COME LAST

Cosmetic repairs are addressed at the end of construction to avoid repeated damage.

### 14 ROUTE QUESTIONS THROUGH US

Do not communicate directly with vendors, subs, or workers onsite. Raise concerns with your CSM.

### 15 NATURAL MATERIALS VARY

Stone, wood, tile, and carpet may vary from samples. Variation is expected and is not a defect.

### 16 POSSESSION FOLLOWS FUNDING

You may not take possession or schedule deliveries until closing is complete and loan has funded.

### 17 FINISH IS TO INDUSTRY STANDARD

Every new home has minor imperfections. Punch is completed to industry standard at Sandlin's discretion.

*Meeting One of Four*

# PRE- CONSTRUCTION MEETING

*Meet your Construction Manager, review the approved plans and selections from your file, and align on how the build will run.*

Your Community Sales Manager will attend alongside you. The purpose is to confirm everything in your file before we break ground — your plan, elevation, structural, electrical, plumbing, and Design Gallery selections — and to walk through how construction and communication will flow.

Because all options were finalized at contract, **no changes can be made at this meeting.** Certain fence and flatwork selections are the exception.

## WHAT WE WILL DO

- ✓ Review your Sandlin Homes Warranty Guide
- ✓ Review your selection sheet and approved plans
- ✓ Review your plot plan and drainage plan
- ✓ Review the construction process and communication cadence
- ✓ Review the job-site safety and visit policy
- ✓ Finalize fence and flatwork selections, if applicable

## WHAT WE WILL NOT DO

- ✗ Change your selections from Design Gallery
- ✗ Add new structural, electrical, or plumbing options
- ✗ Change your elevation
- ✗ Change your plan layout

*Meeting Two of Four*

# PRE- DRYWALL MEETING

*One of the most informative stops in your build.  
See the structure exposed. Confirm placement of  
electrical and plumbing.*

Once framing is complete, your Community Sales Manager will schedule this meeting onsite. Before you arrive, your Construction Manager has inspected lot prep, slab, plumbing, electrical, framing, and roofing.

Because all options were finalized at contract, **no changes can be made at this meeting.**

## WHAT WE WILL DO

- ✓ Review construction progress to date
- ✓ Review placement of electrical and plumbing options
- ✓ See the framing, roof structure, and rough-ins before walls close
- ✓ Answer any questions about process or next steps

## WHAT WE WILL NOT DO

- ✗ Change your selections
- ✗ Add new options
- ✗ Remove existing options
- ✗ Change placement of options

*Meeting Three of Four*

# BUYER ORIENTATION

*An orientation to your new home. Interiors are installed. Landscaping is in. The chance to note any final details before closing.*

Your Warranty Coordinator will orient you to how your new home works — water and gas cut-offs, electrical, HVAC, landscaping and sprinkler, fencing, brick, windows, fireplace, and appliances — and walk through the Sandlin Warranty Program in detail.

You'll also note any final cosmetic details that still need attention. Your Warranty Coordinator will capture those items and route them to our construction team for completion prior to Final Walkthrough. By this point, your home has passed pre-foundation, post-foundation, post-framing, electrical, and final inspections.

## WHAT WE WILL DO

- ✓ Orient you to how every feature and system in your home operates
- ✓ Review the Sandlin Homes Warranty Program
- ✓ Note any final cosmetic details for correction
- ✓ Confirm expectations for the Final Walkthrough

## WHAT WE WILL NOT DO

- ✗ Address major repairs — these are already complete
- ✗ Make last-minute changes to selections or design

*Meeting Four of Four*

# FINAL WALKTHROUGH

*Seven to ten days after Buyer  
Orientation. Your last visit before  
closing.*

Your Warranty Coordinator will walk you through every item from Buyer Orientation to confirm it's been corrected. Once you sign off that all punch items are complete, you'll review the Warranty Program one final time and sign the closing documents.

**Important:** New items cannot be added at the Final Walkthrough. All items for correction must have been captured at your Buyer Orientation.

## WHAT WE WILL DO

- ✓ Confirm Buyer Orientation items are corrected
- ✓ Review the Sandlin Homes Warranty Program
- ✓ Sign completion documents

## WHAT WE WILL NOT DO

- ✗ Add new items — new items cannot be added at this meeting
- ✗ Re-open items already signed off at Buyer Orientation

Warranty

# YOUR SANDLIN WARRANTY

*Every Sandlin home is backed by the StrucSure Express Limited Warranty. Third-party, insurance-backed, three tiers.*

Because this is a third-party, insurance-backed warranty, your protection isn't dependent on any single company remaining in business for the life of coverage. Your Warranty Coordinator will walk you through the claims process at your Buyer Orientation. Year 1 workmanship and Years 1–2 systems claims are submitted through the homeowner portal at [sandlinhomes.com](https://sandlinhomes.com).

I<sub>yr</sub>

COVERAGE TIER 01

## WORKMANSHIP

Defects in workmanship and materials — drywall, trim, doors, windows, paint, flooring, cabinetry, and fixtures.

I—2<sub>yr</sub>

COVERAGE TIER 02

## SYSTEMS

Defects in wiring, piping, and ductwork for electrical, plumbing, HVAC, and mechanical systems.

I—I0<sub>yr</sub>

COVERAGE TIER 03

## MAJOR STRUCTURAL

Major structural defects in load-bearing elements — foundation, floor framing, walls, roof, beams, columns, and masonry arches.

### MAJOR STRUCTURAL CLAIMS

*Major structural claims during Years 1–10 are submitted directly to StrucSure using the instructions in your warranty booklet.*

# WELCOME HOME.

*Your new Sandlin home is complete and ready for  
you to move in.*

Our corporate office coordinates a date and time for you to close at Trinity Title. Once documents are signed, there's one final step — Sandlin Homes cannot release the keys until your purchase has officially funded.

Once we receive confirmation of funding, you receive your keys. And your home is finally *your home*.
